

Community Investment Policy

INTRODUCTION

As a responsible corporate citizen who believes in giving back to the society, KGB is committed to assist in building sustainable and vibrant communities in the areas where we operate. Since Jan 2021, we have developed a Community Investment program which focus on three areas:

- T** - The Underprivileged
- E** - Education
- E** - Environment

OBJECTIVES

With this Community Investment policy, KGB wants to achieve the following objectives:

- 1) Provide hopes to the underprivileged and build a fairer society;
- 2) Leave a lasting and positive impact on our communities and environment; and
- 3) Attract and retain like-minded employees who wants to make a difference in the community

KGB plans to execute the Community Investment program via the following mechanism:

- Assess the needs of our local communities that we operate and identify priority areas that we should focus on.
- Organize various program for the priority areas identified and encourage our people, our suppliers and other stakeholders to participate in the programs.
- Engage with local NGOs or existing community program to provide financial and non-financial assistance.
- Embed the Corporate Social Responsibility (CSR) mentality into our corporate culture.

By focusing on the **TEE** areas that we have selected, coupled with measurable outcomes and deliverable, it will enable us to support the UN Sustainable Development Goals.
