Press Release

FOR IMMEDIATE RELEASE

KELINGTON SECURES THIRD MAJOR CONTRACT IN TWO WEEKS WORTH RM128 MILLION FOR ADVANCED DATA STORAGE MANUFACTURING FACILITY IN SARAWAK

- Brings cumulative contract wins for the facility to RM544 million

Kuala Lumpur, 13 October 2026 – Integrated engineering solutions provider, Kelington Group Berhad ("**Kelington**" or the "**Group**") (stock code:0151) through its wholly-owned subsidiary Kelington Technologies Sdn. Bhd. ("**KTSB**") has secured another contract worth approximately RM128 million on 12 October 2026 from a manufacturing company at Sama Jaya Free Industrial Zone in Kuching, Sarawak ("**Customer**"). This marks the third contract awarded by the same Customer within two weeks for its advanced data storage manufacturing facility in Kuching, Sarawak ("**Project**"), bringing the cumulative value of contracts and purchase orders secured for the Project to approximately RM544 million.

The latest package encompasses the design and build of ultra-high-purity Deionised ("**DI**") Water Generation and Wastewater Treatment Plant ("**WWTP**") systems, for an advanced data storage manufacturing facility. These form part of the facility's critical manufacturing and process utility infrastructure, with works to commence immediately and expected to be completed by April 2028.

The Group had earlier secured two other major contracts from the Customer, valued at approximately RM172 million and RM133 million, as announced on 29 September and 5 October 2026 respectively, alongside other contracts and purchase orders for the Project. Collectively, these work packages span engineering, site infrastructure, structural steel works, and critical process utility systems, reflecting Kelington's growing participation across different aspects of the facility's development.

Mr. Lim Seng Chuan (林成全), Chief Executive Officer of Kelington Group Berhad said, "Securing three major contracts from the same customer within such a short period is a meaningful milestone for Kelington. More importantly, the successive awards have progressively

expanded our role in the development, allowing us to undertake a wider range of engineering and construction works for this advanced manufacturing facility."

"The latest package draws on our experience in delivering critical process utility systems, an area where precision, reliability and technical expertise are essential. Together with the infrastructure and structural works already secured, this demonstrates the breadth of solutions we can provide for complex manufacturing developments. Looking ahead, the Government's continued emphasis on strengthening Malaysia's semiconductor industry under Budget 2027 is encouraging and is expected to support further investments in high-value manufacturing. This presents opportunities for Kelington to leverage our engineering expertise and participate in future developments."

The new award is expected to contribute positively to the Group's earnings and net assets for the financial year ending 31 December 2026 and in subsequent financial years until completion.

The Group's strong contract wins during the year have brought the total value of contracts secured year-to-date to RM4.34 billion, strengthening its order book and enhancing earnings visibility over the coming years.
