KELINGTON'S KUCHING CONTRACTS RISE TO RM544M AFTER FRESH RM128M AWARD

13 October 2026

KELINGTON Group Bhd has secured another RM128 million contract for an advanced data storage manufacturing facility in Kuching, Sarawak, bringing the total value of contracts and purchase orders awarded by the same customer to about RM544 million.

The latest award marks the third major contract announced by the integrated engineering solutions provider for the project in less than three weeks.

In an exchange filing today, Kelington said its wholly-owned subsidiary, Kelington Technologies Sdn Bhd (KTSB), secured the contract on Oct 12 from a manufacturing company operating at the Sama Jaya Free Industrial Zone.

The contract covers the design and construction of ultra-high-purity deionised water generation and wastewater treatment plant systems for the customer's manufacturing facility. Work is expected to commence immediately and be completed by April 2028.

Earlier, on Oct 5, Kelington announced a RM133 million contract from the same customer for major structural steelworks at the facility. That followed a RM172 million contract announced on Sept 29 for engineering and early-stage infrastructure development, including site development, foundation systems and critical high-voltage power infrastructure. The two awards had lifted the project's cumulative contract value to RM416 million.

The counter was down 35 sen or 4% to RM8.38 at 2.30pm today, valuing the company at RM7.4 billion. In the last 52-week, the shares have been trading between RM9.25 and RM4.70. – **TMR**
